

ARMAOR SOFTWARE

# Armaor Light

*The easiest way to the analysis.*

## Simply easy

The light version is an Armaor simplified version , which allows you to start the analysis.

It is easy to start and to implement.

Your first analysis are done easily following step by step the detailed examples which are given.

You have a whole range of shapes ready to use that you can improve according to your needs, you have also a whole range of graphical tools available to make the fixing drawings .

You can print according to your production machines : tags and cutting lists.

You can identify your cut /bent and fixing members by shipping tags.

You can prepare your deliveries easily and print accurate delivery notes .

The light version can be upgraded towards all the other standard Armaor software.

As an option, you can download by bar code (PDF417 or 2D) main part of the stirrup machine available on the market.

This version can be a trial version during one month then can be transformed in definitive version.

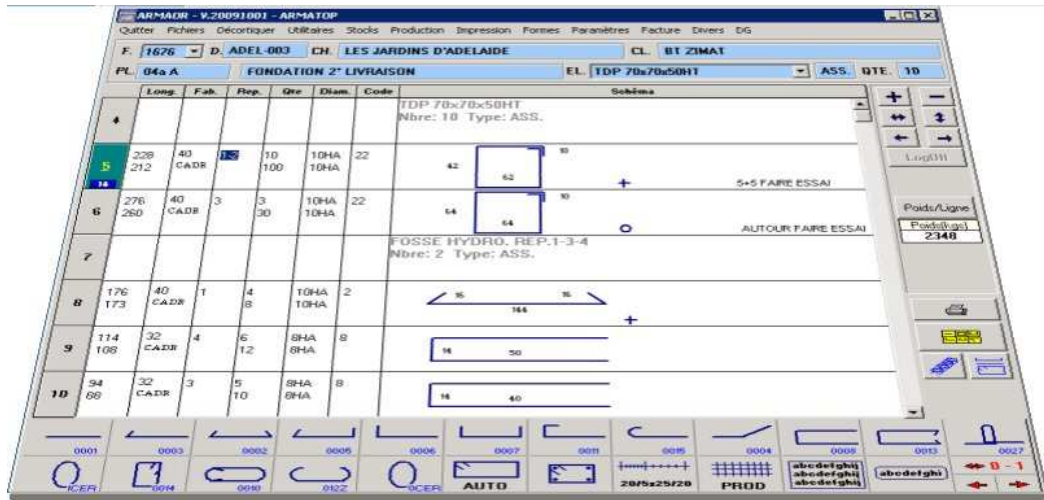

**Bar code :**  
See sheet '**bar code—  
comparison** for information on bar code  
PDF417 and 2D.
