

### Advantages

Traceability can be **established** for each drawing **barmark** and not only for the whole order.

Origin certificates can be **scanned** and **saved**. They can also be printed again and attached to the **delivery** notes..

All the traceability data can be extracted or checked according to the orders or deliveries

### Management stock

Another important point which comes from this traceability is to easily follow the coils and straight bars stock , in real time. .

Each coil (or bar bundles) used will be automatically identified or deducted from the stock
